

**Why are you angry mankind ?**

**When you came onto nature, did it not accept you as one of its own ?**

**Did nature not respect you as the predator you are ?**

**You've become so advanced that you are now ahead of nature.**

**You've built yourselves a society among each other and you don't give nature the respect it gave you.**

**Why is that mankind?**

**Are you now bored of everything you have accomplished ?**

**You've reached heights no other animal can reach.**

**You've created weapons even the strongest animals would fear.**

**You are the strongest and smartest apex predator in all of nature;**

**And yet, you are not satisfied.**

**Why do you hate mankind ?**

**Now you are only among yourselves and you still cause pain.**

**You ran out of threats so you made each other your threats.**

**Who would've thought, a creature so powerful, its demise could only inevitably come from itself.**
